Table 1 : Percentage change of prices in October 2020 over September 2020 and over October 2019

1 The results are based on the surveying of standard double hotel room prices of 3, 4, 5-star hotels and guesthouses in 10 regions of Georgia. Hotels were chosen arbitrarily according to random sampling principle. The study contains 71% (312) of all 3, 4 and 5-star hotels and 25% (456 guesthouses) of all guesthouses registered on www.booking.com The 3, 4 and 5-star hotel price data was collected

by contacting hotels individually, while the prices of guesthouses were taken from booking.com. The average prices are arithmetic mean of standard double hotel room prices.
2 Guesthouse: a type of accommodation that is characterized by having a small number of rooms and services are usually offered by the resident family.

3 The calculation of the hotel price index is based on the recommendations given by the International Monetary Fund (IMF). The elementary aggregate price index is calculated by Jevons index (Consumer Price Index Manual-Theory and Practice (2004), Practical Guide to Producing Consumer Price Indices (2009)).
